Massachusetts Health Professions Data Series: Registered Nurses 2012

OVERVIEW

The Massachusetts Health Professions Data Series: Registered Nurses 2012 Report provides data about workforce demographics of Registered Nurses licensed to practice in Massachusetts. This report is part of the Department of Public Health's Health Professions Data Series currently describing seven licensed health professions: dentists, dental hygienists, pharmacists, physicians, physician assistants, registered nurses, and licensed practical nurses.

The Massachusetts Health Professions Data Series: Registered Nurses 2012 Report represents data from the second cycle of Massachusetts' health professional workforce data collection. This initiative was launched during the 2010 license renewal cycle in coordination with the Division of Health Professions Licensure and its biennial clinician renewal cycle.

The Initiative, and subsequent data analysis and reports, responds to the need for quality and timely data on workforce demographics and employment characteristics of the Commonwealth's healthcare workforce. With a response rate of 83%, the 2012 report is a timely source of robust data.

Chapter 224 of the Acts of 2012: An Act Improving the Quality of Health Care and Reducing Costs Through Increased Transparency, Efficiency and Innovation¹ continues and expands the work of the Health Care Workforce Center established initially in the Acts of 2008. The mandate includes monitoring trends in access to primary care providers within Massachusetts, and reviewing existing data and collecting new data on the capacity of the workforce to serve patients.

The publication of this data series is a step toward fulfilling the mandates of Chapter 224. It complements and contributes to ongoing health care access and payment reform initiatives in the Commonwealth, and federal efforts including the National Center for Health Workforce Analysis Assessment.

The data series characterizes the workforce from a supply perspective. It enhances the Commonwealth's ability to identify trends and patterns in the Commonwealth's health workforce. This Initiative, and subsequent data, is integral to current and future discussions and decisions about healthcare workforce development, education, training, recruitment, and retention. The data helps to ensure the availability of a highly qualified, diverse, and culturally and linguistically competent workforce to meet the current and future needs of all Massachusetts residents.

¹ Chapter 224 of the Acts of 2012: An Act Improving Quality of Health Care and Reducing Costs Through Increased Transparency, Efficiency and Innovation is codified at MGL c.111, §§25L sections L through N: <http://www.malegislature.gov/Laws/GeneralLaws/PartI/TitleXVI/Chapter111/Section25L>

BACKGROUND

During the 2012 license renewal cycle a total of 124,167 Registered Nurses (RNs) were sent a renewal notice with the option to renew online or by mail. A total of 112,814 nurses renewed their license; of those, 83% (n=93,566) completed the 2012 online survey with 26 workforce survey questions. The survey included questions related to demographics, employment characteristics and future work plans. Among these online renewals, 73% (n=68,303) reported working in Massachusetts. 11% reported another US state for their primary nursing position. **The following data represents the responses of Registered Nurses who completed an online renewal between October 2011 and March 2013.**

DEMOGRAPHICS

n = 93,566

Gender:

Females: 93% Males: 7%

Race:

White, Non-Hispanic (NH):	84%
Black, NH:	4%
Asian, NH:	2%
American Indian /	
Alaska Native, NH:	<1%
Native Hawaiian /	
Pacific Islander, NH:	<1%
Hispanic:	2%
Multi-racial:	1%
Decline to Answer:	6%

Languages other than English most frequently spoken with sufficient fluency to provide adequate care: Spanish 5%, Portuguese 1%, Haitian Creole 1%

* LEP is Limited English Proficiency. The data in this chart represents residents who are LEP and whose first language is Spanish.

EDUCATION

n = 93,566

Highest level of nursing education completed: A baccalaureate degree was the highest level of nursing education completed for the greatest number of respondents, n=38,397 (Figure 3). 20% of respondents indicated they would seek additional education.

Location of initial RN licensure education: 73% of respondents reported completing their first nursing degree-credential in Massachusetts. 24% completed this first degree in another US state, 2% in a foreign country, and less than 1% in a US territory.

ADVANCED PRACTICE REGISTERED NURSES

RNs authorized for Advanced Practice Registered Nurse (APRN) practice: Of the 93,566 respondents, 8,007 (9%) nurses reported having APRN authorization in Massachusetts (Figure 4).

FUTURE PLANS

RN's plans in the next five years n = 93,566

No Change in work status:	40%	Decrease Work Hours:	4%
Seek Additional Education:	20%	Return to nursing:	3%
Change Nursing Position:	7%	Leave nursing:	<1%
Plan to retire:	7%	Other:	2%
Increase Work Hours:	4%	Not Applicable	20%

The following data represent responses of all licensed Registered Nurses who reported working either full-time, part-time, or on a voluntary basis in Massachusetts.

EMPLOYMENT CHARACTERISTICS

n = 68,303²

Employment Status:³

Full-time in nursing:	68%	Employed/Non-nursing:	1%
Part-time in nursing:	24%	Unemployed:	<1%
Per Diem in nursing:	9%	Nurse Volunteer:	<1%
Retired:	<1%		

PRIMARY NURSING POSITION CHARACTERISTICS

Most frequently reported practice settings were community hospital/inpatient (20%), academic medical center (16%), and hospital-based ambulatory (11%) (Figure 5):

Most frequently reported areas of practice were acute care (18%), critical care (7%), primary care (6%), home health (6%), and long term care (6%).

Respondents were asked to identify their primary nursing position. The most commonly reported positions were: staff nurses (52%), 7% identified as case managers, 6% identified as charge nurses, and 6% as manager / directors. Only 1,261 (2%) identified as nurse instructors or faculty.

² Number represents all nurses who reported working either full-time, part-time or on a voluntary basis in Massachusetts.

³ Percentages do not add up to 100% due to the respondent's ability to select more than one answer.

GEOGRAPHIC DISTRIBUTION OF NURSING POSITIONS

Of the 68,303 RNs that report working in Massachusetts, the majority of them reported that their primary place of employment was in Boston (n= 18,010 for both RN & APRN).
